## Web Developer

# Kyle Lemire

## Personal Profile

I'm a JavaScript web developer with over 5 years of professional experience eager to expand my skills and build a better, more accessible web. I'm looking for a company that believes accessible design is good design and I look forward to applying my skills to help that company succeed in their mission.

## Experience

2020 — Present

### Freelance Web Development & Consulting

- Designing and building websites and applications with React, NextJS, and GatsbyJS
- Expert consultancy with front-end web development teams, teaching them React and GatsbyJS.
- Leveraging headless CMS's to deliver modern single-page applications with client-editable content.

Feb — Nov 2020

### Web Developer @ Alpine Home Air

- Used React, Redux, and Server-Side Rendering to develop the company's e-commerce platform.
- Learned new server-side programming skills on the job to help support the company's legacy codebase.
- Collaborated directly with the designer to solve creative problems.
- Pushed for accessibility compliance and trained the designer on best practices such as color contrast ratio and ARIA to help inform design decisions.

Jul 2017 — Nov 2020

### Web Developer @ Elyk Innovation

- Personally built and deployed over a dozen client websites.
- Designed and developed custom Wordpress themes from the ground up.
- Trained clients to maintain and update their content, and provided ongoing support.
- Learned to foster and maintain ongoing client relationships.
